

## PROJECT PROFILE

## SEGMENTAL BLOCK FACING

Department of Transportation > IDOT in Elkhart, Indiana

Walltek Design Build, Inc. was proud to be part of this unique wall project. The aesthetically pleasing wall system created a tunnel for the Elkhart City rail system. The original site was a flat parcel of land in which folks typically had to stop and wait for the freight trains to pass. The new underpass structure was developed so traffic can continue to flow without stopping for a train.

**SEGMENTAL RETAINING WALL** Mesa Standard Units

**GEOGRID** Tensar Uxmesa3

**SQUARE FEET** 19,000
